Description Winner of Best New App at the National Association of Broadcasters is a smart utility for enjoying your music. Using up to 8 speakers plus stereo
headphone jack, you can share music wherever you are. PulseAudio support also allows you to use your headphones or a stereo/multimedia system as a
conventional audio source. Plus, it comes complete with some great features: ✓ Automatic Sound Management: Allow automatic switching to a different music
source according to the volume. ✓ Automatic Sound Management: Used when listening to music in headphones, without pressing the skip button. ✓ Global
volume control and AutoPause to stop playback when the screen is off. ✓ AutoPause to stop playback when the screen is off. ✓ Global volume control for all
apps, even those which are playing music through PulseAudio. ✓ Deinterlacing algorithms to mitigate flicker on high dynamic range sources. ✓ Stereo
multichannel audio file support, for headphone users. ✓ Built in equalizer to adjust the sound to your liking. ✓ Antenna tracker. ✓ Supports music sources on
the local network. ✓ Automatically disconnects and reconnects when connecting to a Bluetooth speaker. ✓ Smooth and stable sync when using the music app
with multiple audio sources. Note: This app is in beta stage. The app will update itself once the problems are fixed. What's New in v3.3:- Syncing devices now
use Bluetooth, even if network is available.- New:- Move/Delete audio files with the app (not supported by Play Store's Shared Databases).- Move/Delete audio
files with the app (not supported by Play Store's Shared Databases).- Appearance customization, for the folders and the cloud.- Improved detection of multi-
user devices.- Improved high performance while syncing.- Improved high performance while syncing.- Improved detection of multi-user devices.- Improved
