The game just got released, so not a lot of players are playing at the moment but i hope the number of players increase in due course of time. A few suggestions -

- 1) Include new modes such matchmaking (1vs1, 2vs2, 3vs3 etc ) instead of just having lobbies.
- 2) Include ranked match making and introduce ranks.

The game seems a little overpriced.

Overall great game and a lot of fun to play !

. For \$33.99 me and some friends bought this game to just have some fun but everytime we joined each others game, the person who was host was the only one without major lag. We even tried rotating hosts just incase but it was always the same..

It would be alright if it worked properly.. still not sure if it's worth the \$33.99 price tag.

Only a few players are playing the game, and it requires to play with online-player, not good.. The game is on same stage as it

was ftp via [www](#), but still it is HG. [Hope it is going to get some recognition on Steam Platform. It would be nice if it was also linked with Steam's Workshop. Some lags were occurring when it was 6 ppl on main server and 2 ppl on local. The servers don't look very well.](#)

[.I know it's just a dollar and some cents, but I had to pay for it and now it's free to play? I was neutral about the game until that](#)  
[The game needs a lot of work too.. Had yo buy this for a friend so that he would play it with me, worth it](#)  
[Dats vewy nice. Good Game ! :\). This is really good game alot of options and fun. try this game with friends :\)](#)
