A simple and low-cost polarization-tunable method of generating dual-output vortex beams is proposed and demonstrated. A two-dimensional gold nano-grating hologram and an artificial beam-splitter were employed for the dual-output holographic vortex beam generation and the vortex beam control, respectively. The polarization controllable beam can be switched to vortex beams by simply changing the polarization state of the light source from its initial state. The generation of different holograms in one experimental condition enables access to various vortex beams at the same time, and the polarization-tunable vortex beam pattern can be controlled by varying the polarization state. The experimental results agree well with theoretical predictions.Evaluation of carcinogenic potential of aromatic amines in the rat colon and caecum by the postmitotic repopulation technique. The carcinogenic potential of two aromatic amines, 4-aminobenzoic acid and 2-aminobiphenyl, was studied in the postmitotic colon and caecum of male rats using the postmitotic repopulation technique. Carcinogenesis was induced by providing the animals an aliment containing 0.5% 4-aminobenzoic acid for 2 months. The presence of colon and caecum epithelium at sacrifice shows the carcinogen to have caused carcinomas in these organs in 648931e174

VirusTotal reports it as a trojan, but again, that's all it reports. I have run it through AVAST, Sophos, AVG, Avira, ClamAV, BitDefender, and Webroot, and all of them report it as clean. So, it's like that... and now I can go home. A: You might be getting hijacked and redirected to some kind of malware-related affiliate marketing scheme. I would wager that the reason they insist on displaying ads on the page you linked is to trick you into paying money to the site and also using their services. I once signed up for a free e-mail service, and they asked me to pay for features I had already received for free. If this happens again, report it to these guys. They might be able to shut down the scheme at the least. -2 (7 + (-1 - (5 + -6))) - 12 -5 Calculate -23 + 25 + (3 - -2) + -1. 6 Calculate (-3 - -8) + -2 + -4. -1 Evaluate -4 - (-4 + (1 - -4)). -5 What is the value of 1 + 1 + 3 + -4? 1 What is 3 + (4 - (7 + (-2 - -1)))? 1 What is the value of -2 + (1 - -3) + (-5 - 0)? -3 Evaluate 5 + (2 -
