While Google does provide many useful functions within SketchUp, there are a few things that are better if you know how to do them yourself. For example, V-Ray for SketchUp allows you to add in dynamic lights, so you can now simulate how sunlight will play off of objects in your scene.

Electrochemical study of cadmium immobilized on magnetic beads and their separation from cationic polymers. A study of poly(ethylenimine) (PEI) coated magnetite particles containing cadmium was made using cyclic voltammetry (CV), differential pulse voltammetry (DPV), and electrochemical impedance spectroscopy (EIS). The investigation used the CV technique, which is more sensitive to changes in the surface of the particles, to show the deposition of Cd on the particles. The voltammetry clearly shows the deposition of cadmium on the magnetite core. It was found that the amount of Cd deposited on the PEI coated magnetite beads increases with an increasing amount of PEI coating. The mechanism of Cd deposition is discussed. The EIS method was used to investigate the mechanism of the magnetic response of the PEI coated magnetite particles containing Cd. The main resistance in the EIS spectrum is the charging/discharging process. This resistance is related to the amount of Cd deposited on the surface of the PEI coated magnetite particles. This invention relates to a security document incorporating an image bearing member in which one or more indicia or images of variable type can be used to protect the document, and more particularly to such a security document which is tamper proof. Security document that include a holographic image are well known, such as are described in U.S. Pat. Nos. 3,758,947 and 3,658,125. These patents teach use of a polyester sheet with a holographic image and then bonding a transparent member to the image. The security document is capable of being viewed from any side and it can be difficult to change a desired image on the document. Other security documents using photographic processing of a negative to form a desired image are well known. For example, f678ea9f9e
